OBJECTIVE

I am an enthusiastic student specializing in Artificial Intelligence and Machine Learning, deeply passionate about the fields of coding and software development. I take great pleasure in exploring, learning about, and gaining a thorough understanding of a wide range of technologies as I navigate this fascinating landscape.

EDUCATION

B.Tech CSE (AIML) – [SRM Institute of Science and Technology](#) 2022 - 2026 CGPA - 7.78

SKILLS

Languages	HTML / CSS , Javascript , Python , C , Java , SQL , React js
Frameworks	Typescript , Next js , Express js , Tailwind CSS , Hono , Fast API
Dev Tools	Vs Code, Node js, Bun, Cloudflare Workers, Git, GitHub, Supabase

PROJECTS

[Academic Telegram Bot](#) – (Python, Telegram API)

- Centralized platform for organizing course notes, essential documents, and class schedules.
- Enables seamless access for both students and instructors.
- Automates document retrieval and scheduling updates.

[Optimized Chat-GPT for Cost Efficiency](#) – (Python, OpenAI API)

- Implements a paraphrasing algorithm to shorten the prompts before sending them to Chat-GPT.
- Reduces API usage costs while maintaining response accuracy.
- Enables AI-powered services at a significantly lower price point.

[Chatty AI](#) – (Next.js, TypeScript, Gork API)

- Built with Next.js and TypeScript for optimized performance and maintainability.
- Streams AI-generated content in real time via the Gork API.
- Ensures a smooth, uninterrupted user experience with minimal latency.

CERTIFICATES

- Oracle Cloud Infrastructure
- MATLAB Onramp
- Image Processing Onramp
- Machine Learning (IIT Roorkee)
- Power Bi (TNX)
- AWS Academy Machine Learning
- Foundations of Data
